

COVID-19 resource center

Through the work of the CVS Health Emergency Response & Resiliency Team and Infectious Disease Response Team, we continue to actively monitor the current international and domestic environment for coronavirus-related risks and prepare accordingly. Specifically, these teams are:

- Collaborating with partners across the Enterprise to help bolster business unit preparation and continuity, with a focus on meeting the needs of the consumers and other customers we serve, if and when warranted.
- Developing travel, Work from Home, and other HR-related guidance to help employees stay safe and healthy.
- Working with external public health organizations and other stakeholders, including the Centers for Disease Control and Prevention (CDC), to boost awareness of CVS Health's emergency preparedness efforts and capabilities.

We are actively monitoring the current environment for COVID-19/coronavirus related risks and we continue to implement plans and processes to help keep our employees, customers and patients safe and healthy. Check this site for the latest information from CVS Health about efforts across our company and our Aetna, CVS Pharmacy and CVS Caremark businesses.

Aetna

Insurance Coverage

Effective March 6, 2020, a number of COVID-19 resources are available to Aetna members, including:

- Waived co-pays for all diagnostic testing related to COVID-19 for Commercial, Medicare and Medicaid members
- For the next 90 days, until June 4, 2020, Aetna will offer zero co-pay telemedicine visits – for any reason.

Read more about additional resources and more information available to Aetna members.
